Rajz d.o.o. Sarajevo
Garovci 13
71240 Hadžići
Bosna i Hercegovina

Safety Data Sheet

According to Regulation (EC) No. 1907/2006 (REACH) and in accordance with Regulation (EU) amending Annex II 878/2020

Document No. STL-024	Issue: 2025-04	Date: 18.04.2025.
Product name: BT-GLETEX		

SECTION 1: Identification of the substance/mixture and information on the manufacturer

1.1 Product identifier
Trade name: **BT-GLETEX**
1.2 Relevant identified uses of the substance/mixture and uses advised against
Internal wall leveling compound.
For leveling surfaces on lime, cement and lime-cement mortars, and concrete surfaces, exclusively for interior wall and ceiling surfaces.
The product is not suitable for subsequent installation of ceramics
1.3 Details of the manufacturer/supplier
Manufacturer: Rajz d.o.o. Sarajevo, P.J. Paint and facade factory BAUTREND
Address: Garovci 13, 71240 Hadžići
Contact: 033/420-140
Contact for STL: 033/420-221
e-mail: factory@bautrend.ba

1.4 Emergency telephone number
Ambulance: 124 (00-24)h

SECTION 2: Hazards identification

2.1 Classification of the mixture
In accordance with the Chemicals Act ("Official Gazette FbiH", number: 77/20), and in accordance with Regulation (EC) no. 1272/2008 (CLP) the product is classified as:
Skin irritation, category 2: H315
Eye damage, category 1: H318

2.2. Marking elements
Labeling in accordance with Regulation (EC) no. 1272/2008 (CLP)
Hazard pictograms:

GHS07 GHS05

Hazard symbol: **Danger**
Hazard symbols:
Calcium dihydroxide

GRADIMO POVJERENJE! info@bautrend.ba www.bautrend.ba

Hazard statements:
H315 Causes skin irritation
H318 Causes serious eye damage
Precautionary statements:
P264 Wash contaminated skin thoroughly after handling.
P280 Wear protective gloves/protective clothing/safety glasses
P305+P351+P338 IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present. Continue rinsing.
P302+P352 IF IN SKIN: Wash with plenty of soap and water.
P332+P313 IF SKIN IRRITATION: Get medical advice/attention.
2.3 Other hazards
-The mixture does not meet the criteria for PBT or vPvB according to Annex XIII of REACH Regulation (EC) No 1907/2006.

SECTION 3: Composition/information on ingredients

3.2. Mixture properties data
Mixture of inorganic binders, carbonate fillers, polymers and additives.

Identification number	Name of the hazardous substance	Mass fraction (%)	Classification according to Regulation (EC) No. 1272/2008 (CLP)
CAS: 1305-62-0 EINECS: 215-137-3	Kalcijev dihidroksid $Ca(OH)_2$	5-10%	H315-skin irritation, H318-serious eye damage, H335-STOT SE

SECTION 4: First aid measures

4.1. Description of first aid measures
General instructions: In all cases of doubt, or when symptoms persist, seek medical attention.
After inhalation: Remove person to fresh air and keep calm. Clear throat, drink water to rinse throat, blow nose to remove dust. If symptoms persist, seek medical attention.
After skin contact:
Wash affected area thoroughly with soap and water. Contaminated clothing should be removed and washed thoroughly before reuse.
After eye contact:
Do not rub eyes to avoid mechanical injury to the eye. Immediately flush eyes with plenty of water for at least 15 minutes. Seek medical attention if necessary.

After ingestion:
Do not induce vomiting. If person is conscious, rinse mouth with water and spit. Drink 2-3 dl of water. Seek medical attention immediately.

4.2. Most important symptoms and effects, both acute and delayed
Since the product is classified as a skin irritant, prolonged or repeated skin contact may cause redness, burning, itching and cracking of the skin. Contact with the eyes may cause redness, tearing, irritation, eye pain and irreversible eye damage.
There is no risk of undesirable systemic effects, as local effects (pH effect) are the main health hazards. There are no known delayed effects.

4.3. Immediate medical attention and special treatment
No further relevant information available.
Note: If a doctor is consulted, this Safety Data Sheet must be presented. Symptomatic treatment.

SECTION 5: Fire-fighting measures

5.1. Extinguishing media
The product is not flammable. Adapt the extinguishing media to the surrounding materials.

5.2. Special hazards arising from the substance or mixture
The product is non-flammable and non-explosive and will not facilitate or sustain the combustion of other materials

5.3. Tips for firefighters
There is none

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures
Protective equipment: Wear suitable protective equipment to prevent contamination of skin, eyes and clothing.
Emergency procedures: In the event of an accident, secure the location and evacuate personnel not involved in the clean-up. Prevent dusting of the material.

6.2. Environmental precautions
If the product is spilled into the environment, prevent it from entering waterways, sewers and soil.

6.3. Methods and material for containment and cleaning up
Mechanically collect spilled material and reuse it if possible. Avoid dust formation. Use industrial vacuum cleaners (portable high-efficiency devices) for cleaning. Never use compressed air to clean surfaces. Dispose of collected material in accordance with legal regulations.
Allow wet material to harden before disposal and dispose of in accordance with regulations.

6.4. Reference to other sections
For more information, see sections 8 and 13.

SECTION 7: Handling and storage

7.1 Precautions for safe handling

Protective measures: Transport the product in closed bags (packaging). Ensure good ventilation when working in enclosed spaces.
Fire prevention measures: No special measures are required.
Measures to prevent the formation of aerosols and dust: When preparing to work with the product, first add water to the mixing container, then carefully tilt the bag with the product and slowly start mixing. Do not press empty bags.
Environmental protection measures: Keep bags tightly closed in a horizontal position in areas that are dry and clean. Keep away from drains.
Advice on general hygiene at the workplace: Do not eat, drink or smoke in the working area. Wash hands after each break in work.

7.2 Conditions for safe storage

Store in dry and well-ventilated areas. Keep bags tightly closed in a horizontal position, on pallets, protected from moisture. Do not expose to high temperatures (>25°C) or low temperatures (<0°C). Do not store with acids.

7.3 Specific end use(s)

No further relevant information available.

SECTION 8: Exposure controls/personal protection

8.1 Monitoring parameters

Hazardous ingredient	**CAS number**	**Exposure Limit Values (ELV) mg/m³**
Calcium dihydroxide	1305-62-0	GVI 1, r KGVI 4, r

Note:
TWA - Time Weighted Average (long-term exposure limit): measured or calculated in relation to a reference period of 8 hours Time Weighted Average (TWA) (unless otherwise defined)
STEL - Short-term exposure limit: limit value that should not be exceeded during exposure and which is related to a 15-minute period (unless otherwise defined).
r - Respirable fraction

DNEL:		
1305-62-0 Kalcijev dihidroksid		
Inhalation:	Systemic - Long-term action	1 mg/m3 (Consumer) 1 mg/m3 (Worker)
	Systemic - Short-term action	4 mg/m3 (Consumer) 4 mg/m3 (Worker)

Additional information: The basis was the regulations, which were valid at the time of creation.

PNEC water: Not applicable.
Sediment PNEC: Not applicable.
PNEC soil: Not applicable.
The assessment of the risk to environmental elements is based on the change in the pH of the water. Possible pH changes of surface and underground water, and in wastewater treatment plants, must not exceed the value of 9.

8.2 Exposure controls
Personal protection measures:

Respiratory protection:

In case of heavy dusting, use a protective mask with a filter if the dust concentration is above the GVI.

Hand protection:

To protect your hands, use protective gloves for chemicals that meet the EN ISO 374 standard. After each interruption of work, wash your hands with water and apply a protective cream.

Glove material: In case of permanent contact, gloves made of the following materials are suitable: polychloroprene (material thickness ≥ 0.5 mm), nitrile rubber (material thickness ≥ 0.35 mm), butyl rubber (material thickness ≥ 0.5 mm), fluororubber (material thickness ≥ 0.4 mm), neoprene (material thickness ≥ 0.5 mm).
The selection of the suitable gloves does not only depend on the material, but also on further marks of quality and varies from manufacturer to manufacturer.
Penetration time of glove material:
The exact breakthrough time of the material can be found out from the manufacturer of the protective gloves and should be observed.

Gloves made of the following materials are not suitable for use:
Gloves that are permeable to liquids: made of fabric, leather or similar materials.

Body protection:

Use clothing that ensures the product does not come into contact with the skin and footwear that covers the entire foot.

Eye protection:

Wear safety glasses with side shields to protect your eyes. In dusty environments, wear goggles that fit tightly around your eyes to avoid eye irritation.

Environmental exposure controls
Avoid release to the environment. The product must not come into contact with water, as this may increase the pH value. At pH values above 9, ecotoxicological effects may occur.

SECTION 9: Physical and chemical properties

9.1 Information on basic physical and chemical properties

Physical state:	Solid (powder)
Colour:	Off-white
Odour:	Odourless
Melting point/freezing point, °C	No data available
Boiling point or initial boiling point	Not applicable
Flammability:	Not applicable as the mixture is not flammable
Lower and upper explosion limits:	Not applicable to solids.
Flash point:	Not applicable to solids.
Autoignition temperature:	Not applicable to solids.
Decomposition temperature:	Not applicable as the mixture is not self-reactive and does not contain organic peroxides.
pH:	>11 (mixed mass)
Kinematic viscosity:	Not applicable, applies only to liquids.
Solubility:	Slightly soluble
Partition coefficient n-octanol/water:	Not applicable, does not apply in principle to mixtures.
Vapour pressure:	Not applicable
Density and/or relative density:	No data available

Relative vapour density:	Not applicable, applies only to gases and liquids.
Particle properties:	No data available

9.2 Other information
No further relevant information available.

SECTION 10: Stability and reactivity

10.1 Reactivity
The material acts alkaline with water. After drying, it hardens and forms a solid mass that does not react with the environment.
10.2 Chemical stability
Under normal storage conditions, the product is chemically stable.
10.3 Possibility of hazardous reactions
No dangerous reactions are known.
10.4 Conditions to avoid
Moisture during storage can cause a loss of product quality.
10.5 Incompatible Materials
The moist product is alkaline and reacts exothermically with acids
10.6 Hazardous decomposition products
The product does not decompose into dangerous components.

SECTION 11: Toxicological information

11.1 Information on hazard classes as defined in Regulation (EC) no. 1272/2008
The product has not been tested. The data is derived from the properties of individual components.
Acute toxicity:
Based on the available data, it is evident that the conditions for classification have not been met.

1305-62-0 **Kalcijev dihidroksid**		
Oral	LD_{50}	>2,000 mg/kg (Rat)
Dermal	LD_{50}	>2,500 mg/kg (Rabbit)
Inhalation	LD_{50}	>6.04 mg/l /4h (Rat)

Skin corrosion/irritation: The product is irritating to the skin. Dry mixture in contact with moist skin or skin in contact with moist or wet mixture may cause inflammatory skin reactions such as redness or cracking of the skin.
Skin irritation, category 2.
Serious eye damage or irritation
Direct contact with the product may cause irritation and inflammation and corneal damage.

Skin sensitization
Based on available data, the classification criteria are not met.

Germ cell mutagenicity
Based on available data, the classification criteria are not met.
Carcinogenicity
Based on available data, the classification criteria are not met.
Reproductive toxicity
Based on available data, the classification criteria are not met.
STOT - single exposure
Based on available data, the classification criteria are not met.
STOT - repeated exposure
Based on available data, the classification criteria are not met.

11.2 Other hazards
Endocrine disrupting properties: None of the ingredients are listed.

SECTION 12: Ecological information

12.1 Toxicity The product has not been tested. The data are derived from the properties of the individual components.

1305-62-0 **Kalcijev dihidroksid**	
LC_{50} (96h Sea water)	457 mg/l (Riba) 158 mg/l (Bezkičmenjaci - aquatic invertebrates)
LC_{50} (96h Fresh water)	33,884 mg/l (Asfrički som - clarias gariepinus) 50,6 mg/l (Riba)
EC_{50} (48h)	49,1 mg/l (Bezkičmenjaci - aquatic invertebrates)
EC_{50} (72h)	184,57 mg/l (Alga)
NOEC (72h)	48 mg/l (Alga)
NOEC (14d)	32 mg/l (Bezkičmenjaci - aquatic invertebrates)
NOEC (21d)	1.080 mg/kg (Biljke općenito)
NOEC (96h)	56 mg/l (Gupi - poecilia reticulata)

12.2 Persistence and degradability
The inorganic product cannot be removed from water by biological treatment.
12.3 Bioaccumulative potential
Does not accumulate in organisms.
12.4 Mobility in soil
Not relevant, the inorganic product, after hardening, does not present a toxicological risk.

12.5 Results of PBT and vPvB assessment
PBT: This mixture does not contain any components at concentrations of 0.1% or more that are classified as persistent, bioaccumulative and toxic (PBT).
vPvB: This substance/mixture does not contain any components at concentrations of 0.1% or more that are classified as very persistent and very bioaccumulative (vPvB).

12.6 Endocrine disruption properties
This mixture does not contain components in concentrations of 0.1% or more with endocrine disrupting properties according to the criteria of Commission Delegated Regulation (EU) 2017/2100 or Commission Regulation (EU) 2018/605.

12.7 Other adverse effects
The product is not dangerous for the environment. Addition of large amounts of product to water causes an increase in the pH value and can, under certain circumstances, be toxic to aquatic life. Prevent uncontrolled release into waterways.

12.8 Additional information
There is no further relevant information

SECTION 13: Disposal

13.1 Waste treatment methods
Do not dispose of together with municipal waste. Provide containers for waste collection and hand them over to specialized companies authorized for such work for disposal.

13.1.1 Product/packaging disposal:
In accordance with the Law on Waste Management ("Official Gazette of FBiH", No. 33/03) and the Regulation on Construction Waste, the hardened material is treated as mixed construction waste with the classification number 17 09 04. Packaging residues are classified according to the classification number 15 01 01 (cleaned paper bags can be recycled).

13.1.3 Information related to discharge into the sewer:
Waste should not be discharged into the sewer.

13.1.4 Other recommendations related to disposal:
Keep unused products and dirty packaging closed. Collect dry product residues and store in labeled containers. Use until expiration date or mix residues with water, avoiding any skin contact or inhalation of dust. Allow wet product residues to set and dispose of according to regulations.

SECTION 14: Transport information

The product is not classified as dangerous goods under the provisions of the TDG.

14.1. UN number or identification number
Not assigned

14.2. UN proper shipping name
Not assigned

14.3. Transport hazard class
The product is not classified as dangerous goods (according to ADR/RID, IATA and IMDG). No special precautions are required.

14.4. Packing group
Not applicable

14.5. Environmental hazards
The product is not dangerous

14.6. Special precautions for user
Not required

14.7. Transport in bulk
Not applicable

SECTION 15: Regulatory Information

15.1 Safety, health and environmental regulations/specific legislation for the substance or mixture
EU regulations:
- Directive (EU) 2012/18
Listed dangerous substances by name - APPENDIX I
No ingredients are listed.
-Regulation (EU) 528/2012, on making available on the market and use of biocidal products
Data based on the recipe and information according to raw materials from the supply chain.
No ingredients are listed.
Other EU regulations:
- Regulation (EC) no. 1907/2006 on the registration, evaluation, authorization and restriction of chemicals (REACH) and the establishment of the European Chemicals Agency and on the amendment of Directive 1999/45/EC and the repeal of Council Regulation (EEC) no. 793/93 and Commission Regulation (EC) no. 1488/94 as well as Council Directive 76/769/EEC and Commission Directives 91/155/EEC, 93/67/EEC, 93/105/EC and 2000/21/EC,
-Regulation (EC) No. 1272/2008 on classification, labelling and packaging of substances and mixtures, amending and repealing Directive 67/548/EEC and Directive 1999/45/EC and amending Regulation (EC) No. 1907/2006,
-Commission Regulation (EU) No. 878/2020 amending Annex II to Regulation (EC) No. 1907/2006 of the European Parliament and of the Council on the Registration, Evaluation, Authorization and Restriction of Chemicals (REACH)

National regulation:
- Chemicals Act ("Official Gazette of the FBiH, No: 77/20"),
- Law on General Product Safety ("Official Gazette of Bosnia and Herzegovina, No: 102/09"),
- Law on fire protection and firefighting ("Official Gazette of the FBiH, No: 64/09"),
-Law on Nature Protection ("Official Gazette of the FBiH, No: 66/13"),
- Environmental Protection Act ("Official Gazette of FBiH, No: 15/21"),
- Law on waste management ("Official Gazette of the FBiH, No. 33/03, 72/09 and 72/24"),
- Law on Occupational Safety ("Official Gazette of the FBiH, No: 79/20")

15.2 Assessment of chemical safety
This mixture has not been evaluated chemical safety.

SECTION 16: Other Information

Abbreviations:
CLP: Classification, labeling and packaging
CAS: Chemical abstracts service
EINECS: European inventory of existing commercial chemical substances
GVI: Exposure limit values
DNEL: Derived No-Effect Level
PNEC: Predicted No-Effect Concentration
LD50: Lethal dose, 50%
LD0: Lethal dose 0% represents the dose at which no individuals are expected to die.
LC50: : Lethal concentration, 50%
EC50: Effective Concentration 50 %
NOEC: No Observed Effect Concentration
STOT SE: Specific target organ toxicity, single exposure
PBT: Persistent, Bioaccumulative and Toxic
vPvB: very Persistent and very Bioaccumulative
TDG: Transport of Dangerous Goods
ADR: Agreements concerning the international carriage of dangerous goods by road
RID: Agreements concerning the international carriage of dangerous goods by rail
IATA: : International Air Transport Association
IMDG: International Maritime Code for Dangerous Goods
REACH: Registration, Evaluation and Authorization of Chemicals

Safety Data Sheet

According to Regulation (EC) No. 1907/2006 (REACH) and in accordance with Regulation (EU) amending Annex II 878/2020

Document No. STL-024	Issue: 2025-04	Date: 18.04.2025.
Product name: BT-GLETEX		

Classification method:
For the purposes of classifying the mixture as a method of evolving information from Article 9 of Regulation (EC) no. 1272/2008 was used:
Skin irritation, category 2: Calculation method
Eye damage, category 1: Calculation method

Other information:
The information in this safety-technical sheet describes the safety requirements of our product and is in accordance with the currently valid regulations, and is based on all our previous knowledge. The manufacturer is not responsible for the use and performance of prescribed procedures by the user of the product. The given information ceases to be valid in case of combination with other materials that are not provided in the instructions for use.

GRADIMO POVJERENJE!
